

## **Wout Wessemius presents 'Le Nuage'**

Le Nuage is a suspended light object in the form of – and with the character of – a cloud. The exterior is made of polyester wadding, formed in such a way that there is a difference in light permeability. On the inside, the energy-saving lightbulb is surrounded by a plastic shell which has been specially treated to create a diffuse light with various colour variegations. This gives the light object the character of a cloud through which the sun is shining. Le Nuage creates both ambient and functional light.

Le Nuage can vary in size from 50 cm to more than 10 metres. The smaller models are suitable for home use, for example in living rooms and bedrooms. Larger models provide atmospheric lighting for commercial buildings.

### **Technical specifications**

Material: polyester, polyester wadding  
Energy-saving lightbulb(s): 23 watts  
Weight: approx. 1 kg for 650 mm format  
Format: approx. 500 - 10,000 mm  
Attachment: Stainless steel wire 1 mm  
Placement: Any height desired.
