

BEAM ME UP, SCOTTY

Instead of the traditional crystal chandelier, why not opt for Scotty, a futuristic floating chandelier in geometric, round and oval shapes. Available in 16 different colours and combinations, the Swarovski jewels are attached to rectangular metal frames, which multiply to form the modern, circular shape.

ABSOLUTELY FLOORED

Both aesthetically pleasing and durable, Kayar by Sottsass Associati for ARTIGO was used by Lakonis Architekten for the Gesundheitszentrum U3 Med medical centre project in Vienna. The high-performance rubber flooring is made of a blend of synthetic and natural rubber with coconut fibres.

CORAZON ESPINADO

This one of a kind sofa is the result of Project Rubber, designer Wout Wessemius' experiments with used rubber. Named El Corazon, the sofa's frame is made entirely from the inner tube of a tractor.

ROCK-A-BYE BABY

A different take on the traditional rocking chair, the KAARLO I comes in an array of materials and finishes. On top of providing comfort, the KAARLO I also ensures your privacy from sending that important email to breastfeeding.

MAKING WAVES

Looking like an ordinary stool at first, the solid birch Offcut stool makes use of the curved and irregular pieces of discarded wood (called wayney edges). Another interesting thing to note is that the stool is constructed with wooden pegs rather than screws or glue.
